

Model Your SAP® Solutions Quickly and Effectively

Unlocking Value with Ardoq's Approach

Give Your SAP Solutions Context

How? Swiftly connect your SAP solutions to business capabilities, processes, people, and other systems.

Why? Articulate your SAP solution's business value by understanding its business context; the information it uses, the products and services it supports, and where it lives, whether it is on-premise, a managed service, or in the cloud.

Analyze Quality and Business Value

How? Model your deployments, modules, lines of business, add-ons, and custom code.

Why? Adopt an outcome-driven approach with the right level of detail to deliver the insights you need.

Enrich With Enterprise-Specific Data

How? Leverage the flexibility of Ardoq's graph database to build your unique enterprise context: your strategies, risks, and costs.

Why? Be empowered with the insights you need to inform decision-making and improve execution.

Plan Smoother Upgrades, Extensions, and Migrations

How? Leverage Ardoq's Strategy to Execution Use Case and Ardoq Scenarios to proactively explore and plan change

Why? Make the change process smoother and more efficient, with clear insight into the impact on the organization.
