

Ardoq API Education

Ardoq Services Offering

Learn the power of the Ardoq REST API enabling you to create custom integrations between Ardoq and your third party applications.

What it is

A Professional Services integration consultant will provide the necessary knowledge transfer on the Ardoq API to your technical team via two workshops: The first will cover an introduction to the API and its structure, security and authentication, documentation and best practices for common use cases. The second will center around a live demonstration of API usage, tailored to your area of focus.

This package will also introduce you to the Import Builder; our recommended, no-code solution for importing data from REST APIs.

Ardoq API Education consists of the following:

What you'll accomplish

- Gain the knowledge and skills needed to leverage the Ardoq API.
- Understand the role of the Import Builder as our recommended solution for importing data from REST APIs.

What you'll get

- Introduction, Authentication & Best Practice Workshop.
- Live Demonstration and Examples Workshop.

Each workshop is 1 hour. in duration.

- Benefit from Ardoq advice and guidance related to your specific API use cases.
