

# Standard Integration: Azure to Ardoq

## Ardoq Services Offering

Learn the power of the Ardoq Microsoft Azure Importer enabling you to import Azure resource information into the Ardoq platform to achieve end-to-end traceability from technical viewpoint to strategy.

### What it is

A Professional Services integration consultant will provide you with the necessary knowledge and skills to configure the Ardoq Microsoft Azure Importer feature via four workshops focussing on: validation of scope and connectivity; best practice approach for integration implementation; advanced techniques and follow-on assistance.

Standard integration: Azure to Ardoq consists of the following:

---

### What you'll accomplish

- Learn how to set up the Microsoft Azure -> Ardoq Out of the Box integration to import Azure resource data in line with our best practices
- Training on Ardoq importer features including advanced techniques
- Best practices and roadmap to self sufficiency

### What you'll get

- Workshop 1: Discussion and validation of scope, connectivity confirmation
- Workshop 2: Best practice approach for integration implementation
- Workshop 3: Loading and scheduling complex configurations of components and references, advanced techniques
- Workshop 4: follow-on support workshop.

Each workshop is 1 hour in duration.
