

Standard Integration: ServiceNow to Ardoq

Ardoq Services Offering

Learn the power of the Ardoq ServiceNow Importer enabling you to link your ServiceNow assets into the Ardoq platform to achieve end-to-end traceability from technical viewpoint to strategy.

What it is

A Professional Services integration consultant will provide you with the necessary knowledge and skills to configure the Ardoq ServiceNow Importer feature via four workshops focussing on: validation of scope and connectivity; best practice approach for integration implementation; loading and scheduling complex configurations; and follow-on assistance.

Standard integration: ServiceNow to Ardoq consists of the following:

What you'll accomplish

- Learn how to set up the ServiceNow -> Ardoq Out of the Box integration to import ServiceNow data in line with our best practices
- Understand how to import ServiceNow table data including CIs, CI relationships and reference fields
- Training on Ardoq importer features including advanced techniques

What you'll get

- Workshop 1: Discussion and validation of scope, connectivity confirmation
- Workshop 2: End-end best practice approach for importing ServiceNow data
- Workshop 3: Loading and scheduling complex configurations of components and references, advanced techniques
- Workshop 4: Follow-on support

- Best practices and roadmap to self sufficiency

workshop.

Each workshop is 1 hour in duration.
