

Standard Integration: Signavio Process Modeller

Ardoq Services Offering

Learn the power of Ardoq's Signavio Process Modeller integration enabling you to bidirectionally link between your Signavio process assets and the Ardoq platform to achieve end-to-end traceability.

What it is

A Professional Services integration consultant will provide you with the necessary knowledge and skills to configure the Ardoq Signavio Importer and Exporter features via five workshops focussing on: validation of scope and connectivity; exporting Ardoq components to Signavio dictionaries, importing Signavio processes & activities; importing Signavio dictionaries & relationships and follow-on assistance.

Standard integration: ServiceNow to Ardoq consists of the following:

What you'll accomplish

- Learn how to set up the Signavio Process Modeller integration in line with our best practices
- Training on Ardoq importer features
- Best practices and roadmap to self sufficiency

What you'll get

- Workshop 1: Validation of scope and connectivity
- Workshop 2: Exporting Ardoq components to Signavio dictionaries
- Workshop 3: Importing Signavio processes & activities
- Workshop 4: Importing dictionaries & relationships.
- Workshop 5: follow-on support workshop.

Each workshop is 1 hour in duration.
