

Foundation Onboarding

Ardoq Services Offering

An onboarding program designed to give participants

- *Confidence in how to use the platform*
- *Understanding of Ardoq's recommended approach to EA and modeling principles*
- *Measurable value to stakeholders based on your data*

What is it?

The Foundations Onboarding is your guided path to starting your Ardoq journey. You'll work with your own data, apply Ardoq's recommended practices, and begin demonstrating valuable insights. We will define a focused subset of your data to enable quick value realization and iterative learning.

You will gain confidence in how to use the Ardoq features and load and connect a foundational set of data, including:

- Applications
- People
- Organization and Organizational Units
- Business Capabilities

Ardoq Foundation onboarding consists of a Kick-Off meeting and 4 onboarding sessions, where you will learn how to use the Ardoq platform and load your initial data to set you up for success. Last, we will host an Onboarding Business Review to discuss your accomplishments, establish a long-term roadmap and transition plan.

In these onboarding sessions, you will also learn how to create and maintain various Ardoq assets, such as reports, dashboards, surveys, and other features of the Ardoq platform.

What you'll accomplish

- Establish your application list in Ardoq
- You will have tested and understood how to Automate Application Ownership in Ardoq
- Establish connections between your Business Capabilities and your Applications
- Establish connections between your Organization and your Applications

What you'll get

- One kick-off meeting
 - Six sessions guiding you through the above process
 - One review meeting
 - Access to our self-paced Learning Management System (LMS)
 - A copy of the slide deck materials from the onboarding sessions
-
