Education – Train the Trainer
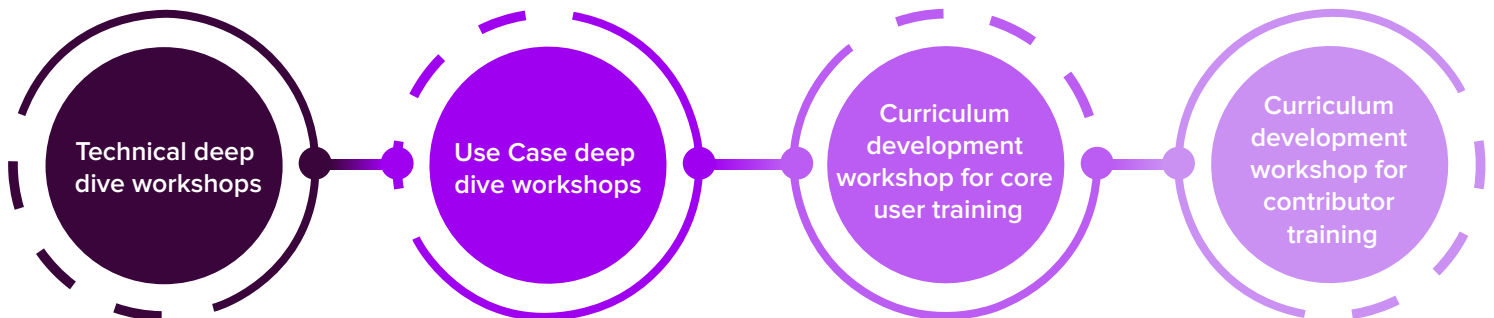

Ardoq Services Offering

Ardoq

Empower your training skills with Ardoq's comprehensive 'Train the Trainer' Program, featuring in-depth technical workshops and process methodology training.

What it is

Ardoq's Train-the-Trainer program is a specialized service offering designed for professionals who aim to become (certified*) trainers in utilizing Ardoq for enterprise architecture and digital transformation. This program builds upon the Standard Education offering and equips participants with comprehensive knowledge and practical skills to effectively teach others how to use Ardoq's platform. It focuses on in-depth understanding of Ardoq's features, best practices for implementation, and strategies for engaging and instructing diverse learning groups.

* Visit our website or contact us for more information on the Certified Ardoq Trainer program.

The Education - Training the Trainer services offering consists of the following:

Technical deep dive workshops → Use Case deep dive workshops → Curriculum development workshop for core user training → Curriculum development workshop for contributor training

What you'll accomplish

- Gain an in-depth understanding of all Ardoq features and use cases, ensuring that you can confidently navigate and utilize the platform.

- Learn about Ardoq's unique process methodologies, enabling you to guide users in implementing Ardoq effectively within their organizational workflows.

- Learn how to create engaging and informative training materials and curricula, tailored to different learning styles and organizational needs.

What you'll get

- Four feature deep-dive workshops

- Two standard use case deep-dive workshops

- Curriculum development (core user) workshop

- Curriculum development (contributor) workshop

  (each workshop is 2 hours in duration)

More information

- All services are delivered remotely unless otherwise communicated and scheduled. Travel and expenses incurred due to a request by the customer will be invoiced at cost.

- All services assume that the assigned Professional Services consultant(s) is granted access to the Customer's Ardoq instance.

- Customer will ensure that all relevant stakeholders are identified and available to participate in workshops, answer questions and otherwise assist Ardoq Professional Services in the completion of the activities.

- Project documents will be shared with Customer via email or other mutually agreed mechanisms and will be deemed accepted by Customer unless notification is received within forty-eight hours highlighting why acceptance is not given.

- All modules must be completed within twelve months of purchase, otherwise they will expire and any unused activities or deliverables will be forfeited.
