

# Custom Use Case Deployment

## Ardoq Services Offering

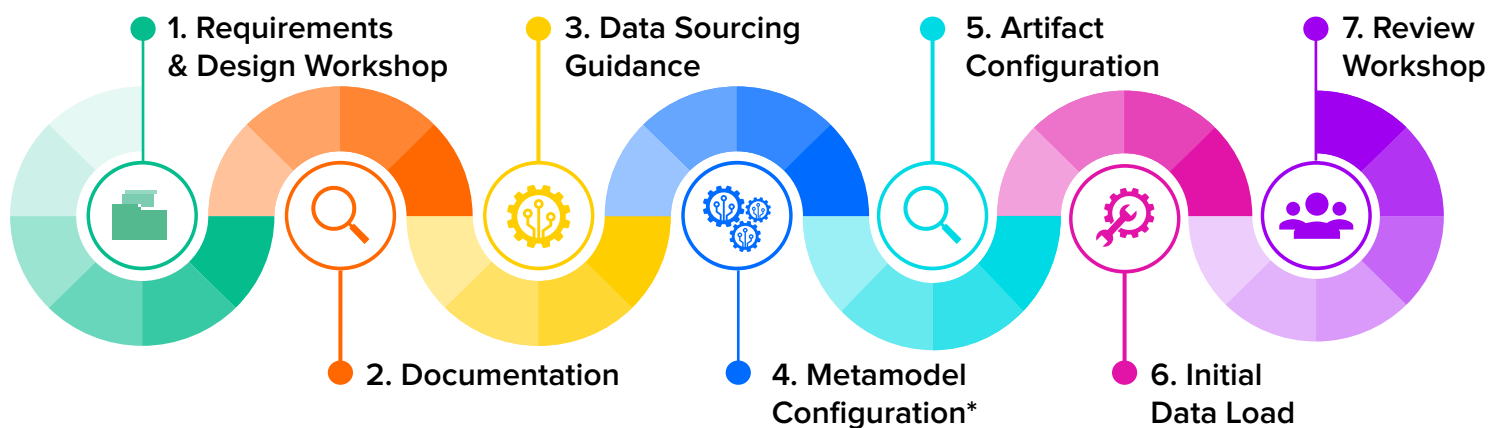

*Guides you through the process of designing, configuring and deploying a custom use case, including a set of custom artifacts that provide insights into the data loaded into the platform.*

### What it is

An Ardoq Professional Services consultant will work with you to agree the requirements and design for your custom use case, including its metamodel, the data to be sourced, how the data will be imported, and what artifacts are needed. These requirements will then be documented and approved together with a time-and-materials estimate of the additional Ardoq Professional Services effort required to configure the use case. Once approved, a series of configuration workshops will be scheduled before an initial dataset is loaded into the use case. The use case deployment is completed with a review workshop to validate what has been accomplished and discuss any next steps for you to continue to iterate on what has been deployed.

Note: this is a time-and-materials based services offering, not a fixed fee. An initial estimate of thirty (30) hours is provided for budgeting purposes only, but actual effort may be significantly more, depending upon your exact requirements.

Custom Use Case Deployment consists of the following:

\* custom use case metamodel may be based upon a gap analysis to a standard Ardoq use case with customization as required.

### What you'll accomplish

- A comprehensive design for your custom use case
- Guidance on how to source the required data

### What you'll get

- Use case requirements & design workshop
- Use case design document
- Data sourcing guidance workshop

- Configuration of a custom metamodel and artifacts that bring your data to life
- Metamodel configuration workshop
- Artifact configuration workshop
- Initial data load workshop
- Use case deployment review workshop

---

## More information

- All services are delivered remotely unless otherwise communicated and scheduled. Travel and expenses incurred due to a request by the customer will be invoiced at cost.
- All services assume that the assigned Professional Services consultant(s) is granted access to the Customer's Ardoq instance.
- Customer will ensure that all relevant stakeholders are identified and available to participate in workshops, answer questions and otherwise assist Ardoq Professional Services in the completion of the activities.
- Project documents will be shared with Customer via email or other mutually agreed mechanisms and will be deemed accepted by Customer unless notification is received within forty-eight hours highlighting why acceptance is not given.
- All modules must be completed within twelve months of purchase, otherwise they will expire and any unused activities or deliverables will be forfeited.

---

## About Ardoq Professional Services

Ardoq Professional Services is a Global team of consultants focused on enabling Customers and Partners in the use of the Ardoq platform in order to achieve rapid time-to-value and deliver the insights that help drive business transformation and achievement of strategic objectives. We leverage a suite of Ardoq best practices that have been developed over many years of experience to address common business challenges faced by our Customers. Ardoq Professional Services offers advisory, educational, configuration and integration guidance through a comprehensive set of modular packages and custom options that are targeted towards achieving expectations and realizing value from our Customers' investment.
