

Standard Use Case Deployment

Ardoq Services Offering

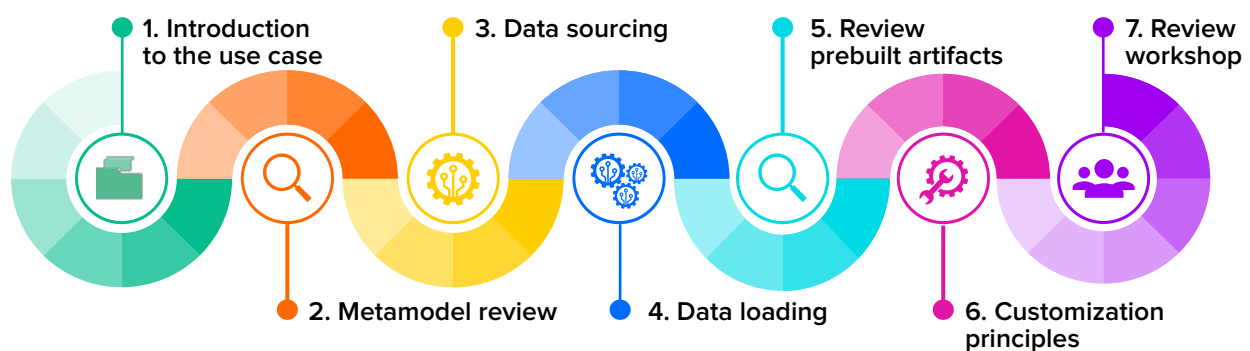

Guides you through the process of deploying one of the Ardoq standard use cases and benefiting from the time-saving, pre-built artifacts and insights that provide quick time-to-value.

What it is

An Ardoq Professional Services consultant will explain the selected, standard use case and discuss its metamodel with you to ensure you understand the data that needs to be sourced. Once an initial data set is available, the consultant will demonstrate how to load it into the Ardoq platform using the Excel Importer and then walk you through the prebuilt artifacts that are included in the use case and give you immediate, value-adding insights into your data. We will also discuss the approach to customizing the standard use case (although no customizations are actually made as part of this package) and answer any general questions you have. The use case deployment is completed with a review workshop to validate what has been accomplished and discuss any next steps for you to continue to iterate on what has been deployed.

Standard Use Case Deployment consists of the following:

What you'll accomplish

- Gain an understanding of the chosen Ardoq standard use case and how it helps you towards achieving your objectives
- Understand how to load data into the standard use case
- Realize early value from the prebuilt artifacts that come to life once data is loaded

What you'll get

- Use case overview and metamodel review workshop
- Initial data sourcing & load workshop
- Prebuilt use case artifacts workshop
- Use case customization principles workshop*
- Use case deployment review workshop

* Note: customisation of the use case is out of scope

More information

- All services are delivered remotely unless otherwise communicated and scheduled. Travel and expenses incurred due to a request by the customer will be invoiced at cost.
- All services assume that the assigned Professional Services consultant(s) is granted access to the Customer's Ardoq instance.
- Customer will ensure that all relevant stakeholders are identified and available to participate in workshops, answer questions and otherwise assist Ardoq Professional Services in the completion of the activities.
- Project documents will be shared with Customer via email or other mutually agreed mechanisms and will be deemed accepted by Customer unless notification is received within forty-eight hours highlighting why acceptance is not given.
- All modules must be completed within twelve months of purchase, otherwise they will expire and any unused activities or deliverables will be forfeited.

About Ardoq Professional Services

Ardoq Professional Services is a Global team of consultants focused on enabling Customers and Partners in the use of the Ardoq platform in order to achieve rapid time-to-value and deliver the insights that help drive business transformation and achievement of strategic objectives.
